-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Art Unit: 1711

1. Claims 27-29 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Within claims 27 and 28, the language, "... the foam stabilizers is a silicone" and "... a temperatures of 50°C", is grammatically incorrect.

Claims 28 and 29 are considered to be improper, because, in accordance with U. S. patent practice, a "use" is not a proper category of invention. Applicants should claim a process.

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

Art Unit: 1711

3. Claims 28 and 29 are rejected under 35 U.S.C. 103(a) as being unpatentable over Dammann et al. ('083).

Patentees disclose polymeric compositions comprising polyisocyanates, active hydrogen compounds, and catalysts, wherein amine oxides are disclosed as being suitable catalysts. See column 10, line 64. Furthermore, patentees disclose reaction temperatures of 50 to 150°C. See column 11, lines 30-33.

4. Since amine oxides were known catalysts for polyisocyanate based polymer systems at the time of invention, the position is taken that it would have been obvious to select such catalysts from the disclosures of the prior art and employ them within the instant polyisocyanate based reaction system. It has been held that it is *prima facie* obvious to utilize a component for its known function. *In re Linder*, 173 USPQ 356; *In re Dial et al.*, 140 USPQ 244.

5. Despite applicants response, claims 28 and 29 are not limited to the production of foams and patentees clearly disclose that the activator may be present in the form of a liquid.

6. Claims 1-27 are allowable over the prior art of record.
